SUMMARY

Results-driven B.Tech Information Technology student with strong expertise in FastAPI, backend development, and AI/ML integration. Experienced in building scalable systems through internships and real-world projects, and recognized as a Smart India Hackathon 2025 Grand Finalist.

EDUCATION

•Panimalar Engineering College, Chennai	2027
B.Tech., Information Technology	CGPA/Percentage: 8.88
•IIFE Laxmi Raman Matric Higher Secondary School	2023
State Board of Secondary Education, Tamil Nadu	CGPA/Percentage: 82.33

PROJECTS

•Toxic Comment Detection (IEEE - Paper Presentation)	August 2025
Toxic Comment Detection In Web Chat	
– Built a real-time toxic comment detection system using React, Nodejs, and NLP models – Integrated REST APIs for live message analysis and moderation – Improved chat safety by automatically filtering harmful content – Used MongoDB for storing chat data and user interactions	
•Language Agnostic Bot	December 2025
A language-agnostic chat bot is an AI system that can understand and respond to users in multiple languages.	
– Developed a multilingual chatbot supporting multiple languages using React and FastAPI – Integrated LLaMA-3 and Pinecone for intelligent response generation – Designed REST APIs for seamless frontend-backend communication – Achieved finalist position in Smart India Hackathon 2025	

INTERNSHIP

•ELEWAYTE	June-July 2023
Artificial Intelligence Intern	Bengaluru
– Performed data analysis using Python to extract insights for AI-based applications – Applied basic statistical methods and data preprocessing techniques for model readiness	
•TANSAM	Feb-Mar 2026
Research Assistant Intern	Chennai
– Developed backend services using FastAPI and REST APIs for dynamic SQL query generation – Built an AI-powered system integrating LangChain for real-time database interaction and response generation – Handled structured data processing, duplicate record management, and API-based data retrieval	

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Frontend: React.js, HTML, CSS

Backend: Node.js, FastAPI, Flask

Core Concepts: Data Structures Algorithms, REST API Development, Object-Oriented Programming

Databases: MongoDB, PostgreSQL, Oracle SQL

Developer Tools: Git, GitHub, VS Code

AI/ML: NLP, LangChain, LLaMA-3, HuggingFace

ACHIEVEMENTS

SA Hackathon – Runner Up (Mar 2026)

- Developed an ERP system for multi-file enterprise workflow management using full stack technologies

Google Hackathon – Top 3 (Feb 2026)

- Built a language-agnostic chatbot using React, APIs, and Google tech stack for real-time multilingual support

Code-A-Thon – Top 10 (Jan 2026)

- Designed a cross-platform toxic comment detection system using NLP and REST APIs

Smart India Hackathon – Grand Finalist (Dec 2025)

- Developed an AI-powered college assistant chatbot with multilingual support and backend API integration
